

FRAME FLOOR – ADD SECONDARY FRAME, BATTENS, FLOORING

Modified on: Thu, 8 Aug, 2019 at 3:39 PM

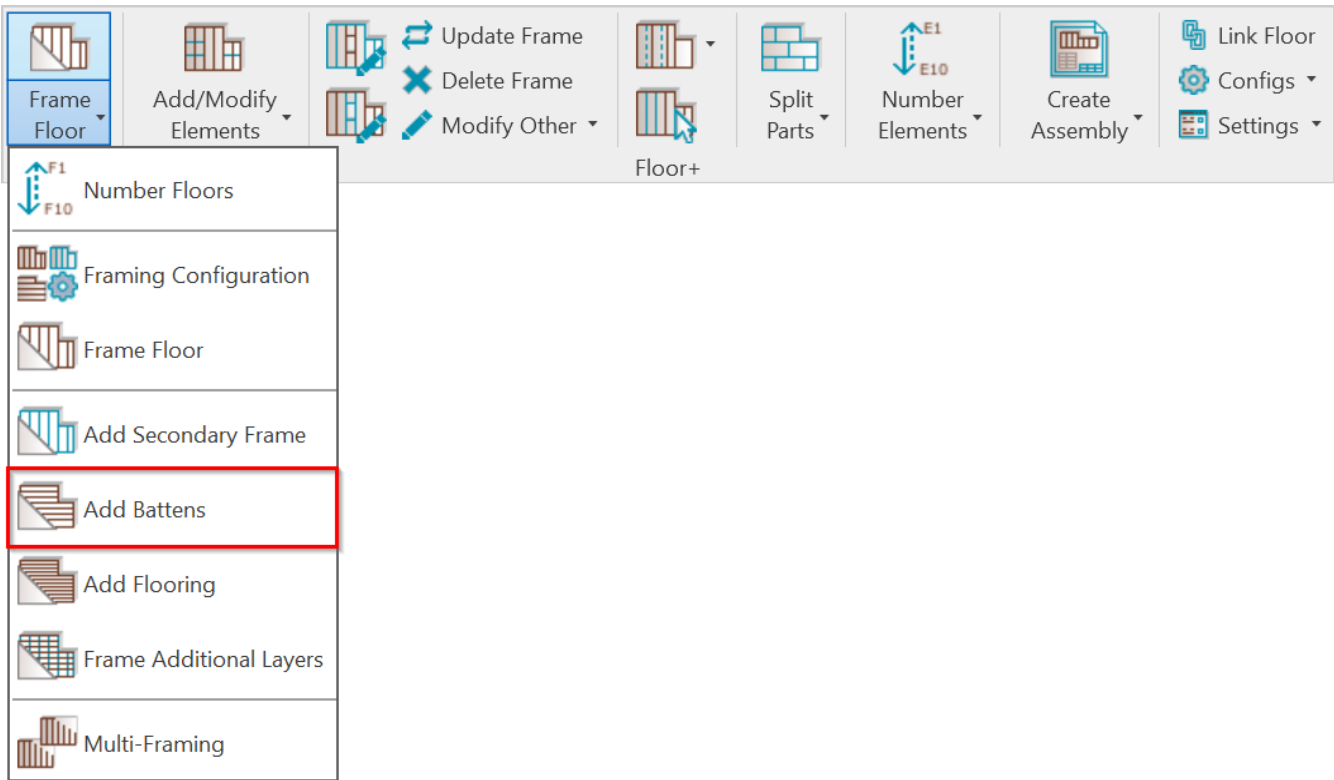

Add Secondary Frame

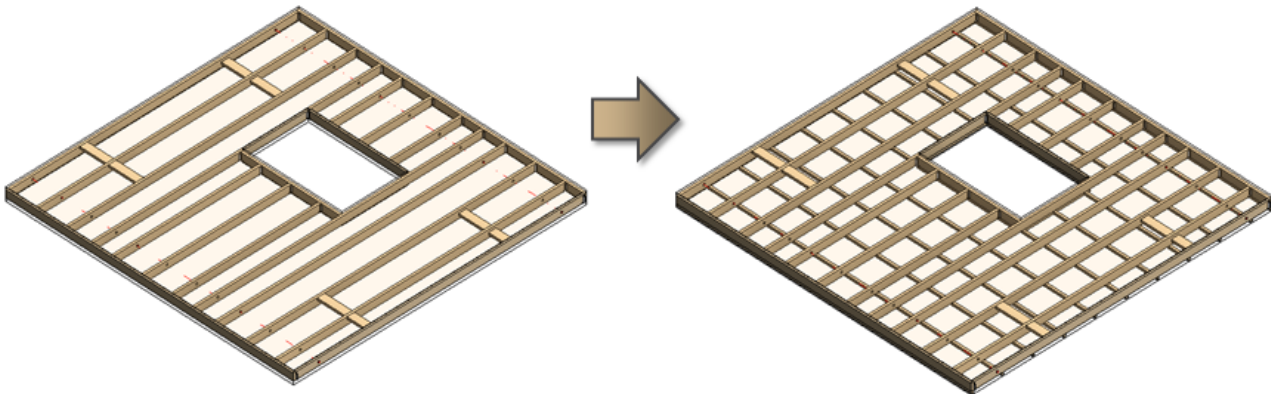

Add Secondary Frame – adds secondary frame to selected floors.

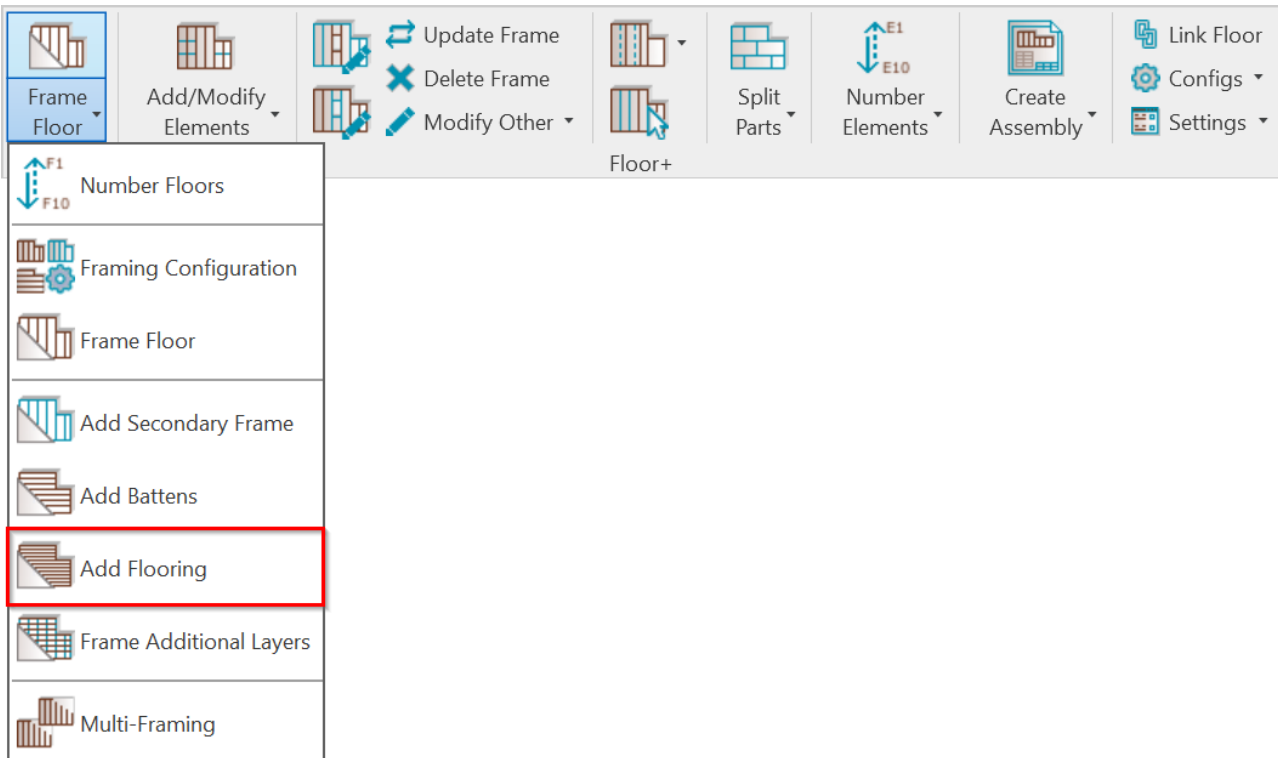

Add Battens

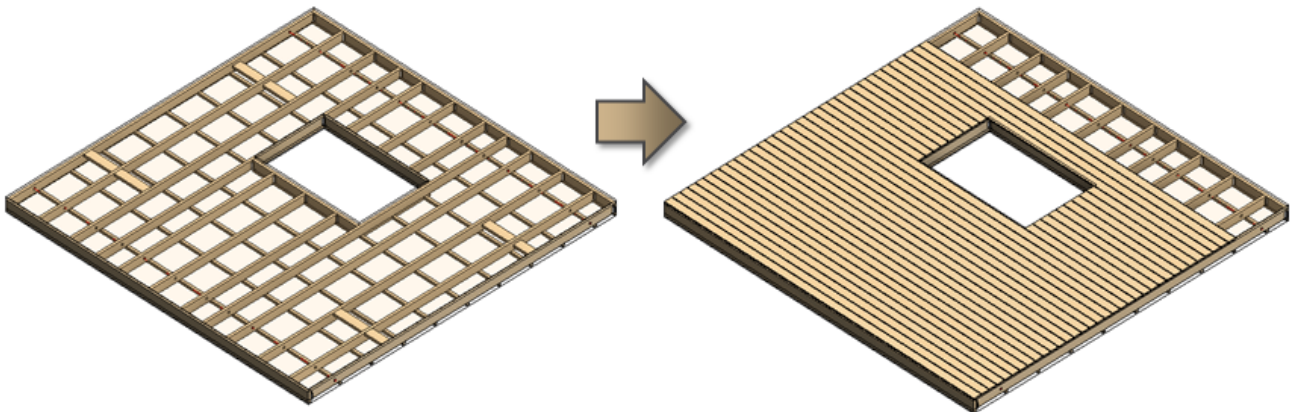

Add Battens – adds batten beams to selected floors.

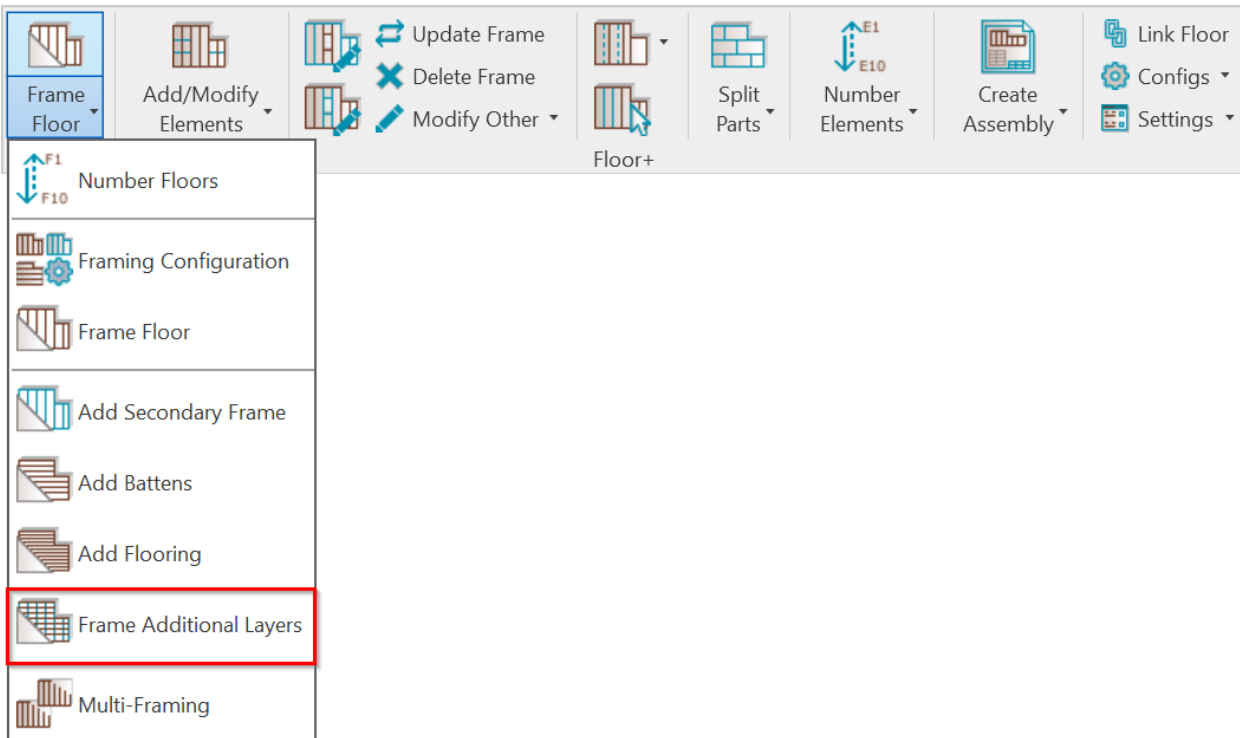

Add Flooring

Add Flooring – adds vertical, horizontal, or mixed flooring to selected floors.

Frame Additional Layers

Frame Additional Layers – automatically frames all other layers (battens, flooring, secondary frame) excluding the Main Frame. (No need to click **Add Battens** or **Add Flooring** separately.)

The layers to be framed need to be selected in the **Frame** column in **Link Floor**:
