

FRAMING CONFIGURATION – Configurations

Modified on: Tue, 2 Feb, 2021 at 7:16 PM

Framing Configuration may be found in two locations:

or:

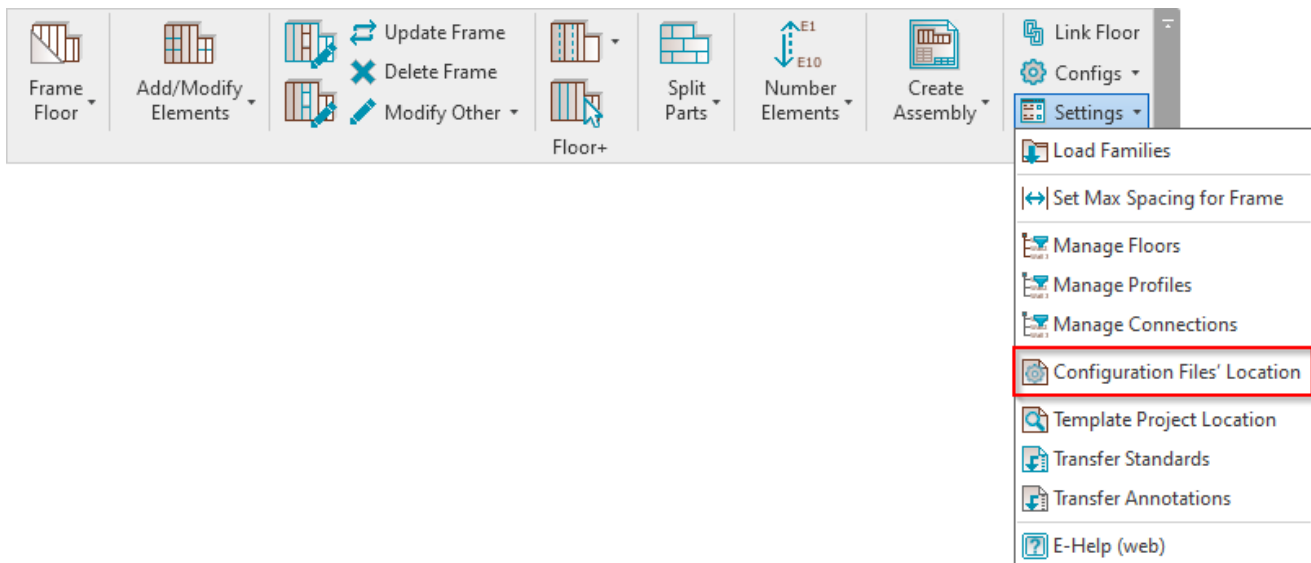

Configuration Type – choose the type of framing you want to configure. The possible options are: **Frame**, **Secondary Frame**, **Batten**, **Flooring**:

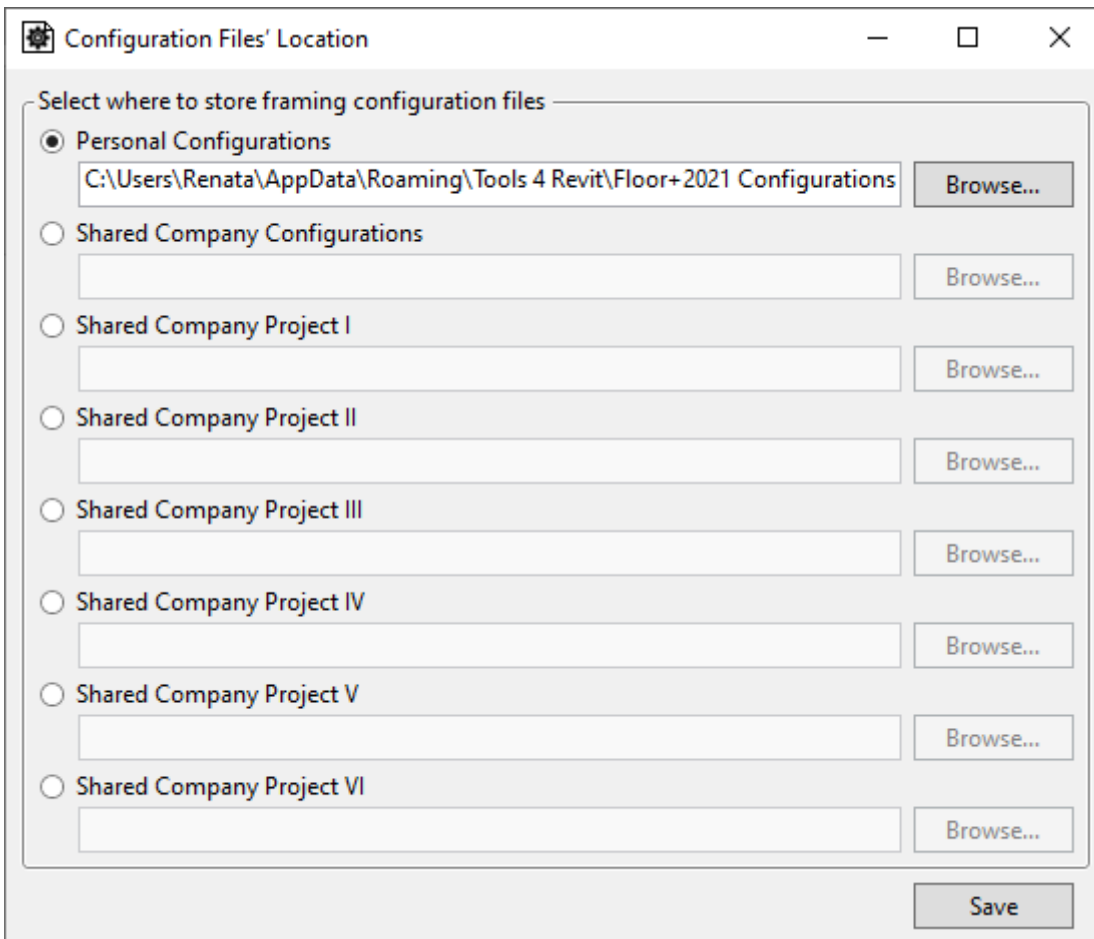

Configuration Name – configuration with all framing settings. You can use the sample configurations or create new ones. Also, you can rename or delete the existing configurations.

By default, **Floor+** framing configurations are saved in *C:\Users\user name\AppData\Roaming\Tools 4 Revit\Floor+2021 (or other version) Configurations\Framing Configurations\Imperial or Metric* catalog. The content from this catalog can be copied to other users' computers if needed. Also, the path can be changed in **Floor+** → **Settings** → **Configuration Files' Location**.

> This PC > Local Disk (C:) > Users > Renata > AppData > Roaming > Tools 4 Revit > Floor+2021 Configurations >

Name	Date modified	Type	Size
CustomFramingJoins	2020-07-19 13:33	File folder	
Details Configurations	2020-07-19 13:31	File folder	
Framing Configurations	2020-07-19 13:29	File folder	
Mark Configurations	2020-07-19 13:29	File folder	
Part Configurations	2020-07-19 13:29	File folder	
Sheathing Configurations	2020-07-19 13:29	File folder	
Tool Settings	2020-07-19 13:29	File folder	
Workshop Configurations	2020-11-21 20:37	File folder	

One framing configuration contains a folder and an XML file under the same name:

Material Class:	Wood	▼
Configuration Type:	Batten	▼
Configuration Name:	M_Floor Batten	▼
