# FRAME ROOF – ADD MAIN FRAME

Modified on: Sat, 9 Jan, 2021 at 7:09 PM
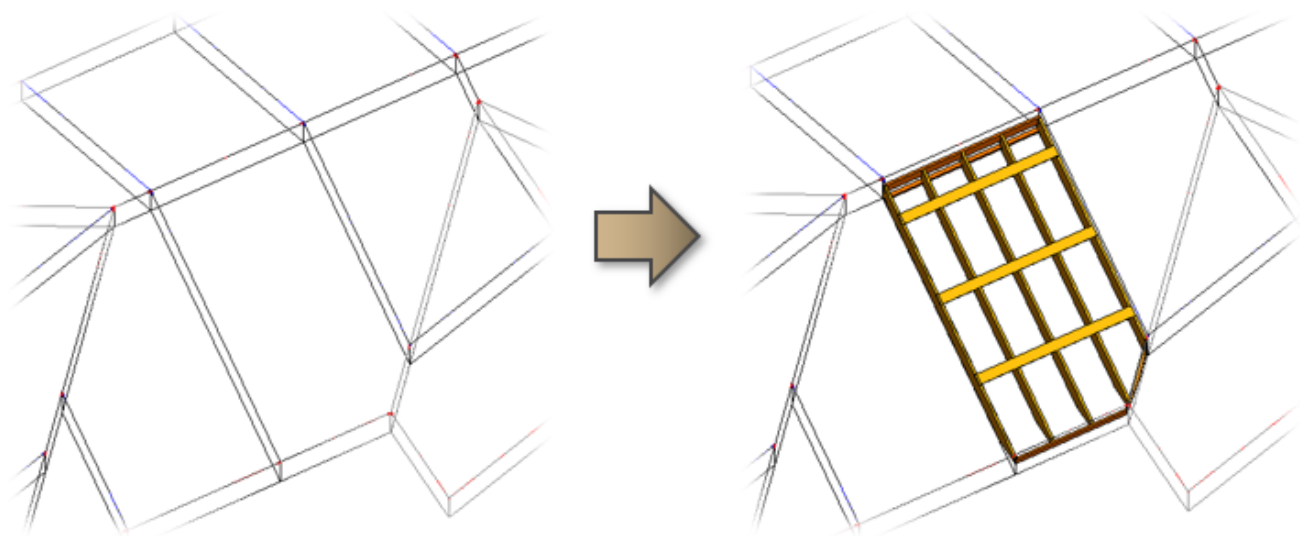

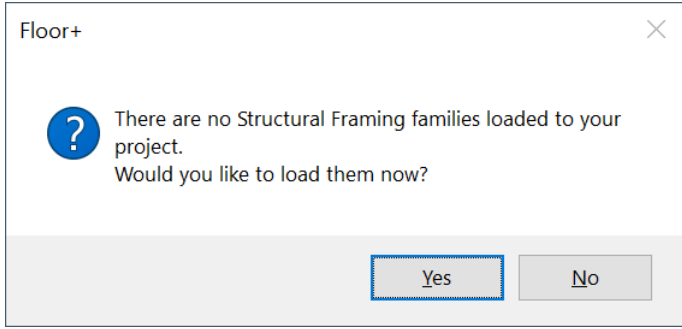

Frame Roof

Or:

Frame Roof – frames selected roofs or parts from the model according to predefined configuration.

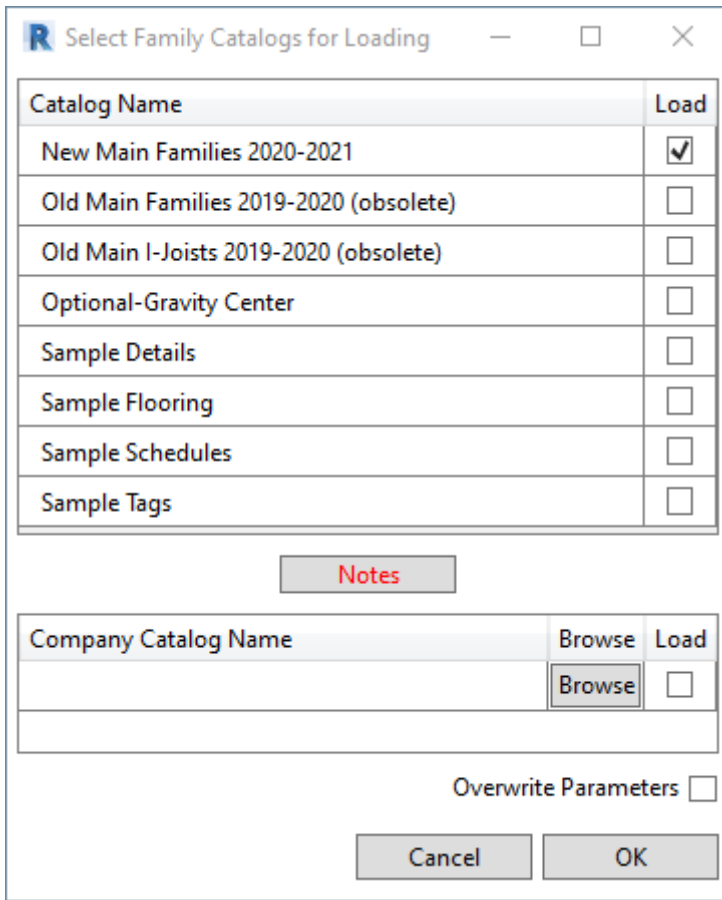

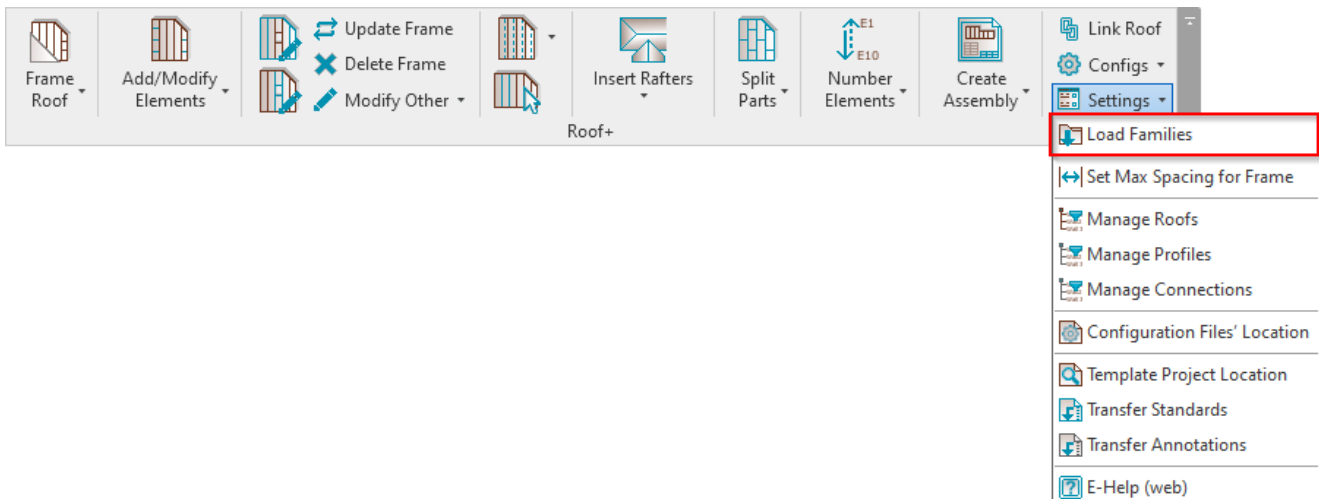

First time in the project

The first time you click **Frame Roof** in a new project, you will get a message that the framing families are not loaded. You can load them directly from here:

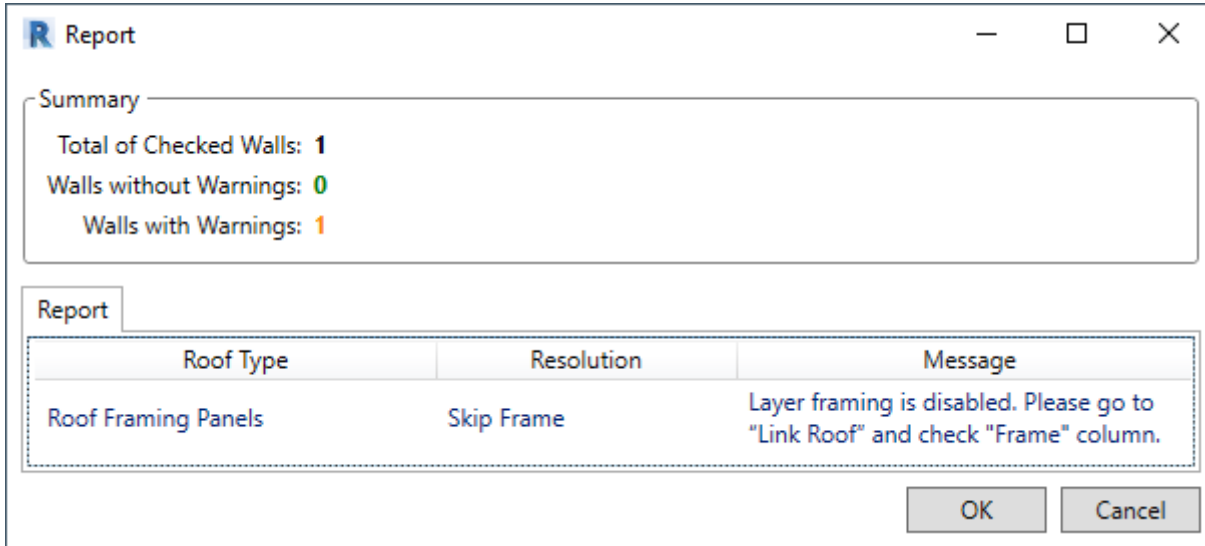

Just click OK:

Framing families can be also loaded using **Roof+ → Settings → Load Families**:

Read more Load Families>> **(https://agacad.freshdesk.com/support/solutions/articles/44001785710-load-families)**

Roof+ checks the status of selected roofs. If there is something wrong with the roofs, you will get a detailed report. In the image below, you can see possible report messages.
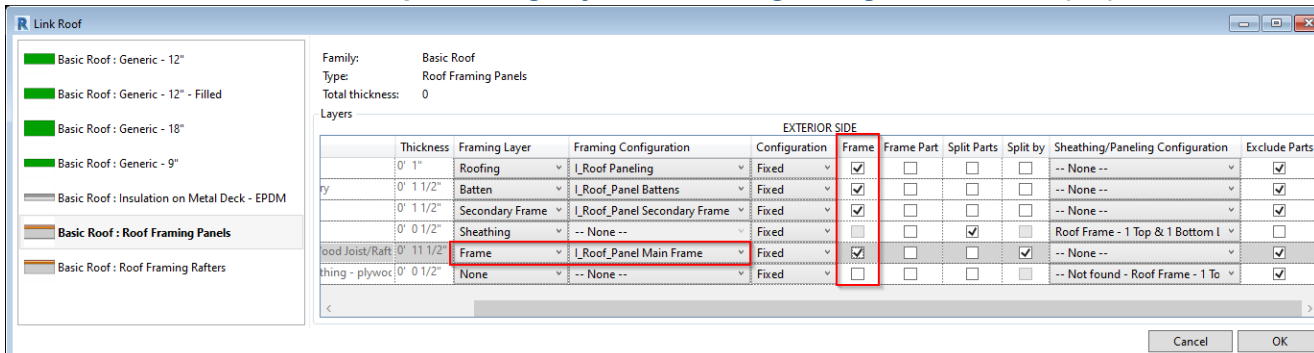

*Let's solve the problem of the **Roof Framing Panels** roof type:*

*To fix these kinds of problems, you usually need to go to **Link Roof** and check the situation:*

Roof Framing Panels has framing possibility disabled, so you just need to select the checkbox near the
*Frame column. You can also assign **Framing Layer** and **Framing Configuration** for every layer:*

*There is no problem if framing configuration in not assigned to the layer. You can assign it in the **Link Roof** dialog, or*
*Roof+ will give you this option during the **Frame Roof** process:*

*Selected a sample framing configuration, which automatically comes with **Roof+**, and click OK:*

Result:
