

FRAMING CONFIGURATION – Configurations

Modified on: Tue, 2 Feb, 2021 at 7:23 PM

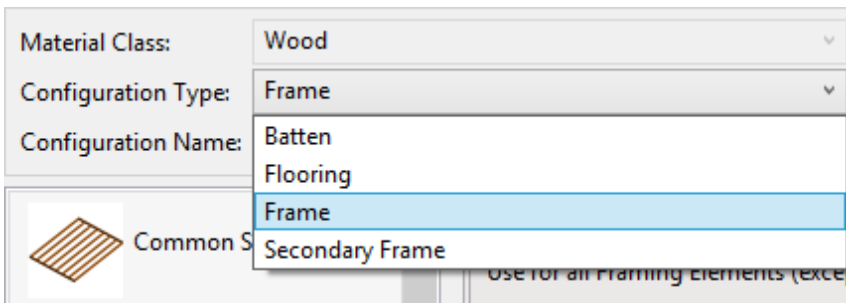

Framing Configuration may be found in two locations:

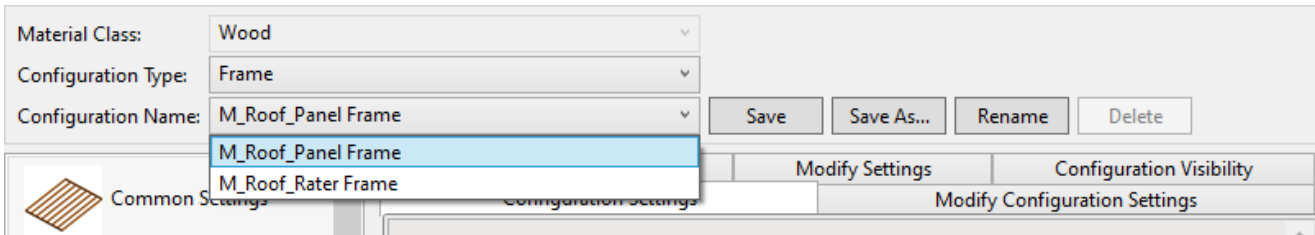

OR:

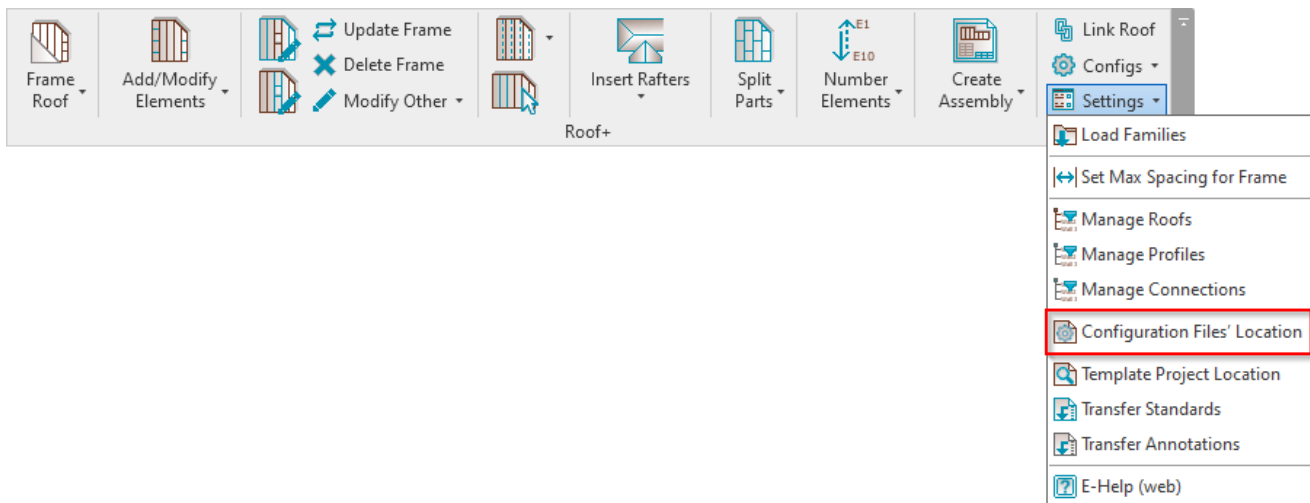

Configuration Type – choose the type of framing you want to configure. The possible options are: **Frame, Secondary Frame, Batten, Roofing**:

Configuration Name – configuration with all framing settings. You can use sample or create new configurations. Also, you can rename or delete the existing configurations.

By default, **Roof+** framing configurations are saved in *C:\Users\user name\AppData\Roaming\Tools 4 Revit\Roof+2020 (or other version) Configurations\Framing Configurations\Imperial or Metric* catalog. The content from this catalog can be copied to other users' computers if needed. Also, the path can be changed in **Roof+** → **Settings** → **Configuration Files' Location**.

Configuration Files' Location

Select where to store framing configuration files

Personal Configurations

Shared Company Configurations

Shared Company Project I

Shared Company Project II

Shared Company Project III

Shared Company Project IV

Shared Company Project V

Shared Company Project VI

C:\Users\Renata\AppData\Roaming\Tools 4 Revit\Roof+2020 Configurations

Name	Date modified	Type	Size
CustomFramingJoins	2019-07-29 14:04	File folder	
Details Configurations	2019-07-31 19:08	File folder	
Framing Configurations	2019-07-29 14:02	File folder	
HipValley Configurations	2019-07-29 14:02	File folder	
Mark Configurations	2019-07-29 14:04	File folder	
Part Configurations	2019-07-29 14:02	File folder	
Sheathing Configurations	2019-07-29 14:02	File folder	
Workshop Configurations	2019-08-21 19:25	File folder	

One framing configuration contains a folder and an XML file under the same name:

Material Class:

Configuration Type:

Configuration Name:

C:\Users\Renata\AppData\Roaming\Tools 4 Revit\Roof+2020 Configurations\Framing Configurations\Metric
