

Smart View Configurations - View Name

Modified on: Thu, 3 Jun, 2021 at 2:19 PM

After you create views with Smart Views, they will be named following rules defined in the View Name tab. The name of the view may be composed of available parameters.

Host Mark comes from the Mark parameter value of the element, for which you are creating the views.

View name parameter value comes from Smart Views Setup.

A **Prefix** and **Suffix** may be added for selected parameters.

Arrows at the bottom allow you to switch places of parameters.
